

- Detects all levels of bed bug infestations
- Black design attracts bed bugs and allows for easier identification of early instars
- Crack and break-resistant
- No powder, tape or additives necessary
- Detection as early as two weeks
- Can be combined with the SenSci Activ® bed bug lure to increase catch

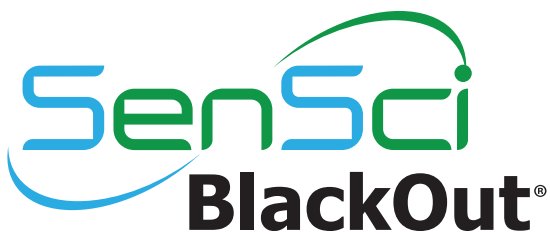

# BlackOut®

## BED BUG DETECTOR

THE PROVEN INNOVATION FOR BED BUG DETECTION

351 Lawrence Station Rd. Lawrenceville, NJ 08648

[SenSciOnline.com](http://SenSciOnline.com)

SenSci BlackOut catches bed bugs to detect their presence in a structure by placing the device under the legs of beds and upholstered furniture to help intercept bed bugs as they move throughout the environment searching for a blood meal.

BlackOut is developed by the innovation team that brought you the SenSci Activ® and SenSci Volcano®
